SUMMARY

Results-driven Full Stack Software Engineer with 2+ years of experience in designing, developing, and optimizing scalable Java EE and web applications. Proficient in both frontend and backend technologies, with expertise in building high-performance, user-centric platforms. Adept at architecting spring boot and implementing best practices in DevOps. Passionate about problem-solving, system design and delivering efficient, maintainable code. Proven track record of leading projects, collaborating with cross-functional teams, and mentoring junior engineers to drive technical excellence.

SKILLS

- **Backend:** Spring Boot, RESTful APIs, Hibernate, Spring MVC, Microservices.
- **Frontend:** HTML, JavaScript, CSS, React JS.
- **Databases:** Oracle SQL, MySQL, PostgreSQL.
- **Cloud & DevOps:** Azure, Git, GitHub, Jenkins, Jira
- **Build Tool:** Maven, Gradle.
- **Languages:** Java (proficient), HTML, CSS, JavaScript.
- **Tools & IDEs:** Eclipse, IntelliJ IDEA, VS Code.

EXPERIENCE

OLIVE CRYPTO SYSTEM PVT. LTD. – SDE-II | JAVA DEVELOPER

May 2024 – Present

Unified Payments Interface (UPI) for Union Bank of India (UBI)

Hyderabad Telangana

- Developed and implemented UPI payment features, including payment flow, transaction management, UPI Lite, and Delegate Payment functionalities. Collaborated on new implementations such as Delegate Payment and OC-181 features for UPI enhancements.
- Developed optimized applications using Spring Boot, JPA, JavaScript, and Microservices, reducing page load times by 30% and improving overall performance.
- Achieved 90% code coverage using Mockito for robust unit testing and improved application reliability.
- Contributed to user growth and incremental revenue by optimizing product features, enhancing user acquisition strategies, and supporting annual team goals.

DCB Bank Portal – IPO Lien Removal

- Developed an end-to-end IPO Lien Removal module for DCB Bank covering Maker, Checker, Status, and MIS pages using Spring MVC, Thymeleaf, HTML, CSS, JavaScript, and jQuery.
- Built secure CSV / Excel file upload workflows with validations, duplicate handling, insufficient data checks, and downloadable status/MIS reporting.
- Implemented scheduled batch jobs, approval workflows, and email notifications for automated lien release processing and banking operations.

Karya Portal – Internal Task Management Portal

- Worked with a 4-member team to develop an internal portal for tracking user activity, task progress, and status updates using React JS, Tailwind CSS, Java, and Spring Boot.
- Developed responsive UI components and integrated REST APIs for real-time task monitoring and workflow updates.
- Improved performance and user experience through frontend optimization, code refactoring, and API integration.
- Contributed to testing, debugging, and code reviews to ensure application stability and maintainability.

EDUCATION

Chhattisgarh Swami Vivekananda Technical University Bhilai (CSVТУ)

Bachelor of Technology in Electrical Engineering (CGPA: 8.73/10)

Apr 2018 – July 2022

Bhilai, Chhattisgarh

COURSEWORK

Data Structures & Algorithms (DSA), System Design, Relational Database Management System (RDBMS), Microservices.
