SUMMARY

Results-driven Full Stack Software Engineer with 2+ years of experience in designing, developing, and optimizing scalable Java EE and web applications. Proficient in both frontend and backend technologies, with expertise in building high-performance, user-centric platforms. Adept at architecting spring boot and implementing best practices in DevOps. Passionate about problem-solving, system design and delivering efficient, maintainable code. Proven track record of leading projects, collaborating with cross-functional teams, and mentoring junior engineers to drive technical excellence.

SKILLS

- **Backend:** Spring Boot, RESTful APIs, Hibernate, Spring MVC, Microservices.
- **Frontend:** HTML, JavaScript, CSS, React JS.
- **Databases:** Oracle SQL, MySQL, PostgreSQL.
- **Cloud & DevOps:** Azure, Git, GitHub, Jenkins, Jira
- **Build Tool:** Maven, Gradle.
- **Languages:** Java (proficient), HTML, CSS, JavaScript.

EXPERIENCE

OLIVE CRYPTO SYSTEM PVT. LTD. (SDE-II JAVA DEVELOPER) Unified Payment Interface (UPI)

May 2024 – Present
Hyderabad Telangana

- Developed and implemented UPI payment features, including payment flow and transaction management. Collaborated on the new implementation like delegate payment and OC 181 features for UPI, enhancing.
- Developed an optimized, Spring boot, JPA and JavaScript, reducing page load times by 30% and improving performance.
- Achieved 90% code coverage using Mockito for robust unit testing.
- Contributed to 80% user growth and helped drive incremental revenue by optimizing user acquisition strategies, enhancing product features in achieving annual team goal.

DCB Bank Portal – IPO Lien Removal

- Developed an end-to-end IPO Lien Removal module for DCB Bank covering Maker, Checker, Status, and MIS pages using Spring MVC, Thymeleaf, HTML, CSS, JavaScript, and jQuery.
- Built secure CSV / Excel file upload workflows with validations, duplicate handling, insufficient data checks, and downloadable status/MIS reporting.
- Implemented scheduled batch jobs, approval workflows, and email notifications for automated lien release processing and banking operations.
- Integrated backend services using Spring Boot, JPA, REST APIs, and Oracle SQL, ensuring smooth transaction flow and improved operational performance.

Karya Portal – Internal Task Management Portal

- Worked with a 4-member team to develop an internal portal for tracking user activity, task progress, and status updates using React JS, Tailwind CSS, Java, and Spring Boot.
- Developed responsive UI components and integrated REST APIs for real-time task monitoring and workflow updates.
- Improved performance and user experience through frontend optimization, code refactoring, and API integration.
- Contributed to testing, debugging, and code reviews to ensure application stability and maintainability.

EDUCATION

Chhattisgarh Swami Vivekananda Technical University (CSVTU)
Bachelor of Technology in Electrical Engineering (CGPA: 8.73/10)

Apr 2018 – July 2022
Bhilai, Chhattisgarh

COURSEWORK

Data Structures & Algorithms (DSA), System Design, Object-Oriented Programming (OOP), Relational Database Management System (RDBMS), Microservices.
